## Product Features

### Real-time Video, Watching at Will

Supporting various intelligent terminals, it makes you watch live video anytime, anywhere.

### Motion Detection, Real-time Alarm

It supports motion detection by microwave, and can auto-capture dynamic images. After images comparing it would transfer the alarm message to your smartphone or tablet if it judged that your properties were

### Intelligent videoing, Quick Reviewing

It supports auto-recording, and can quickly locate pictures by timeline.

### P2P Services, Secure and Convenient

Deploying P2P technology, it can establish direct connection between the smartphone and the camera. To ensure the data security and prevent it from data leaking, all video pictures are stored locally, instead of saving in the server.

### Smart home

A key to the remote control intelligent home appliances.

### Easy security, Just watching

### No Cable, Just WiFi, Three Steps to View the Image
